NEW MOBILITY WORKSHOP

Toronto, September 14

This advanced workshop offers participants a thorough understanding of current trends propelling transportation into an extraordinary revolution. It will explore the potential economic, environmental, and social impacts that are potential outcomes of vehicle automation and related advancements. These sessions cut a path through speculation and uncertainty to focus on the specific risks, opportunities, and choices cities and communities face right now, and to offer a set of tools and ideas for how to navigate them.

PARKING WORKSHOP & SUPPLIER SHOWCASE

Cambridge, October 3

This workshop serves as a forum for parking enforcement professionals from across Ontario to network with fellow colleagues and learn from industry experts. The workshop's Supplier Showcase also offers attendees the opportunity to see the latest in parking related technology and to speak with vendors first-hand to discuss the current needs of your municipality.

BICYCLE FACILITIES WORKSHOP

Toronto, October 10

This workshop encompasses all aspects of on-road and off-road bicycle facility safety and includes an overview of the state-of-the practice in road user safety, common bicycle facility safety issues, and potential contributory factors. It also systematically walks the participants through modules on planning and designing on-road, shared use and rural bicycles facilities for safety, intersection and interchange treatment, delineation and access control, at-grade rail crossings, bridges, roundabouts, and roadside safety.
